## NEW! ECCO® Wireless Rechargeable Beacon

The EB5200A wireless rechargeable LED beacon is a non-permanent warning light solution for any work truck, utility truck, or any other commercial vehicle application that's ready to use right out of the box. This durable, battery-powered beacon mounts to the roof of the vehicle in seconds with a sturdy vacuum-magnet mount and can quickly be removed when it's not in use. Rubber housing on the bottom of the beacon protects the vehicle's paint from damage or scratching when mounting or removing. The EB5200A LED beacon features a wireless remote to turn the beacon on / off and to cycle through seven flash patterns and comes with a cigarette-plug charging cable.

- 12-24 VDC, 0.8 amps
- 7 flash patterns
- Plug-n-play out of the box, no wiring needed
- Remote for on / off and flash pattern control
- Cigarette charging cable
- Over 6 hours of active use
